

I bought the XM radio for a reason, I like to hear the kind of music I want not the overplayed pop rock the corporate radio stations want me to listen to. I also like to listen to political talk shows that represent all views not just the corporate men that make me sick to my stomach to listen to. I pay a monthly charge to have options to my listening entertainment and if this is taken away then that is the most un-american thing that could happen. The media airwaves are for the American people not corporations and government to tell me what I have to listen too. Is this American or Nazi-Germany.
